 Warm Tip

- 1、 The password should be 8 to 20 characters long and may include numbers, uppercase and lowercase English letters, and special characters. It is case-sensitive. To enhance the security of your password, it is recommended to use a combination of numbers, letters, and special characters, and to avoid using patterns or predictable sequences.
- 2、 Do not use this feature in public places, such as internet cafes or on someone else's computer.
- 3、 Your online banking password is an important piece of information for using online banking. Please keep it safe to prevent it from being lost or forgotten.
- 4、 Avoid using easily guessable numbers or letter combinations, such as your date of birth, bank card number, phone number, car license plate number, etc., to prevent others from easily guessing or cracking your password.
