KBank Corporate Internet Banking Introduction:

KASIKORNBANK Corporate Internet Banking (Hereinafter referred to as “KBank IB”) is a one-stop online financial service platform designed for all types of corporate clients. Leveraging our unique advantages deeply rooted in the Southeast Asian market, we provide secure, efficient, and convenient digital services to meet enterprises’ comprehensive financial needs, including account management, payment and settlement, foreign exchange transactions, and bank-enterprise integration. We help enterprises efficiently expand into the Southeast Asian market, conduct cross-border trade smoothly, and achieve online, intensive, and intelligent fund management.

Core Functions

บริการทุกระดับประทับใจ

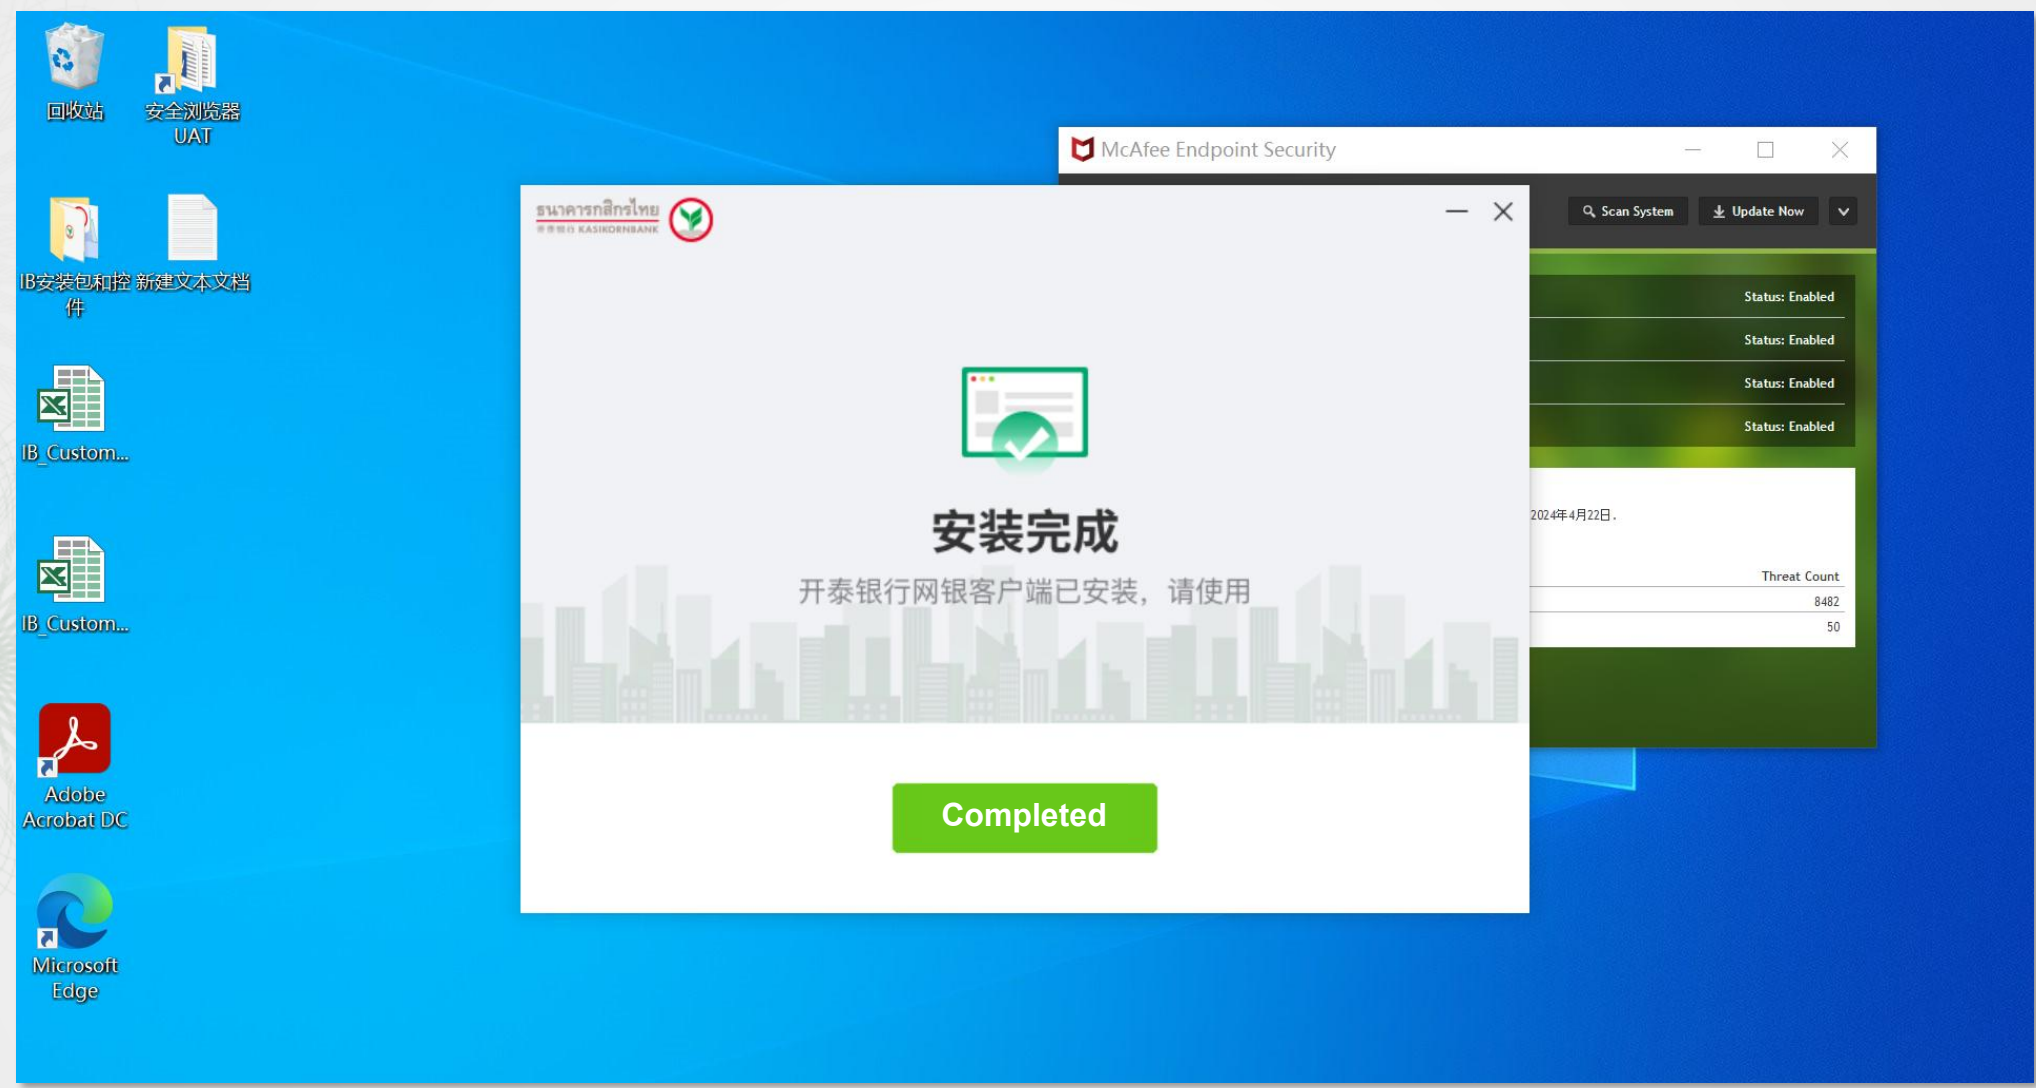

Installation

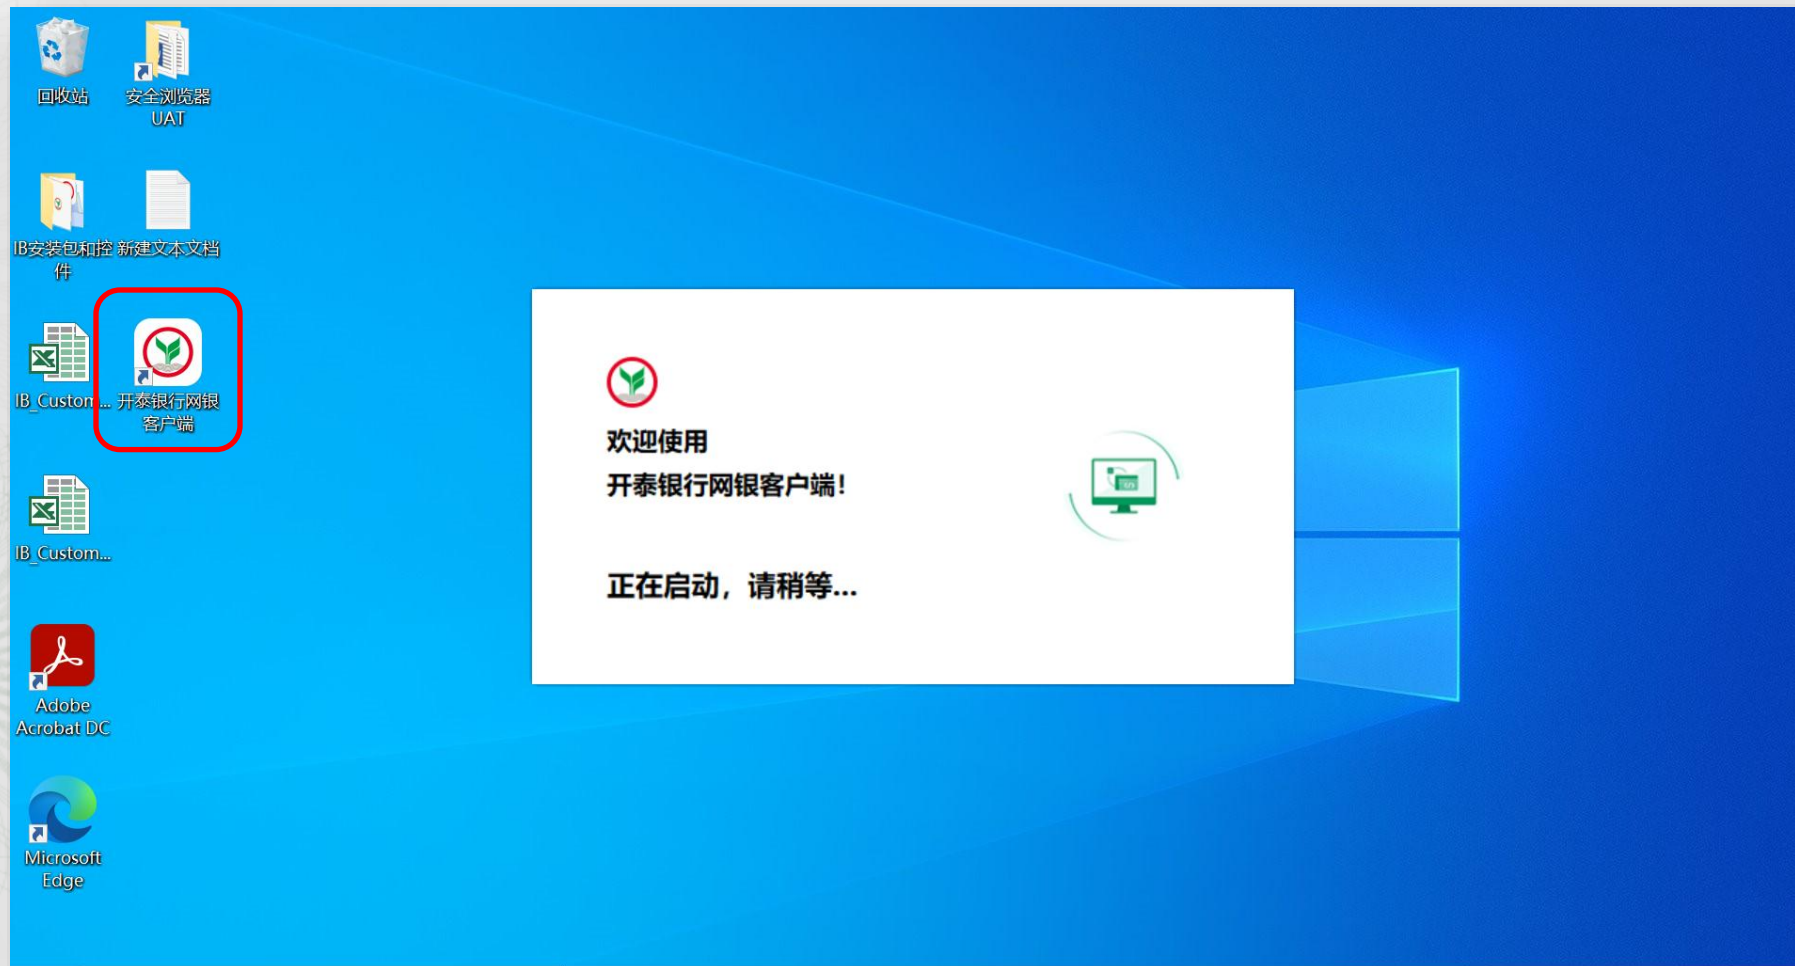

Due to the security policies of the company, computer administrator privileges may be required for authorized installation.

บริการทุกระดับประทับใจ

Installation

บริการทุกระดับประทับใจ

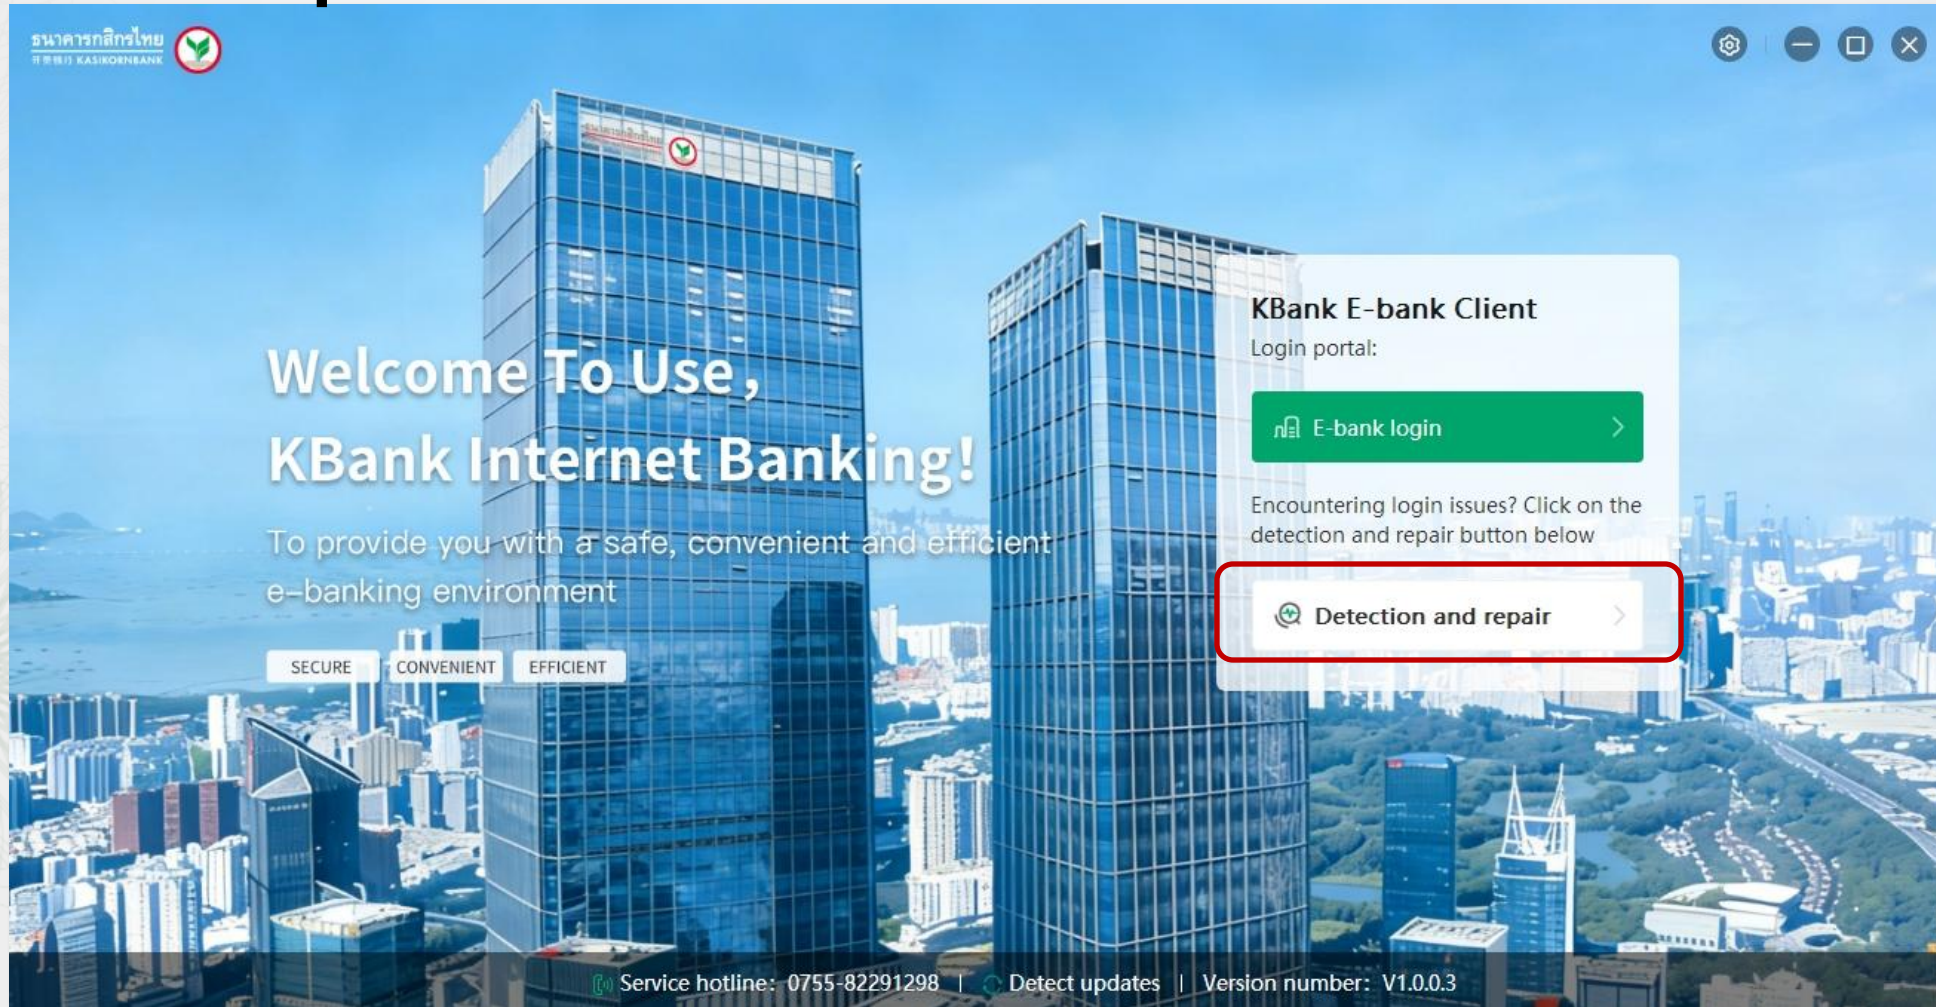

When the USB Key is inserted, the system will automatically pop up the login page for the internet banking App;
Or click the icon on the computer desktop to open it.

Change the Language

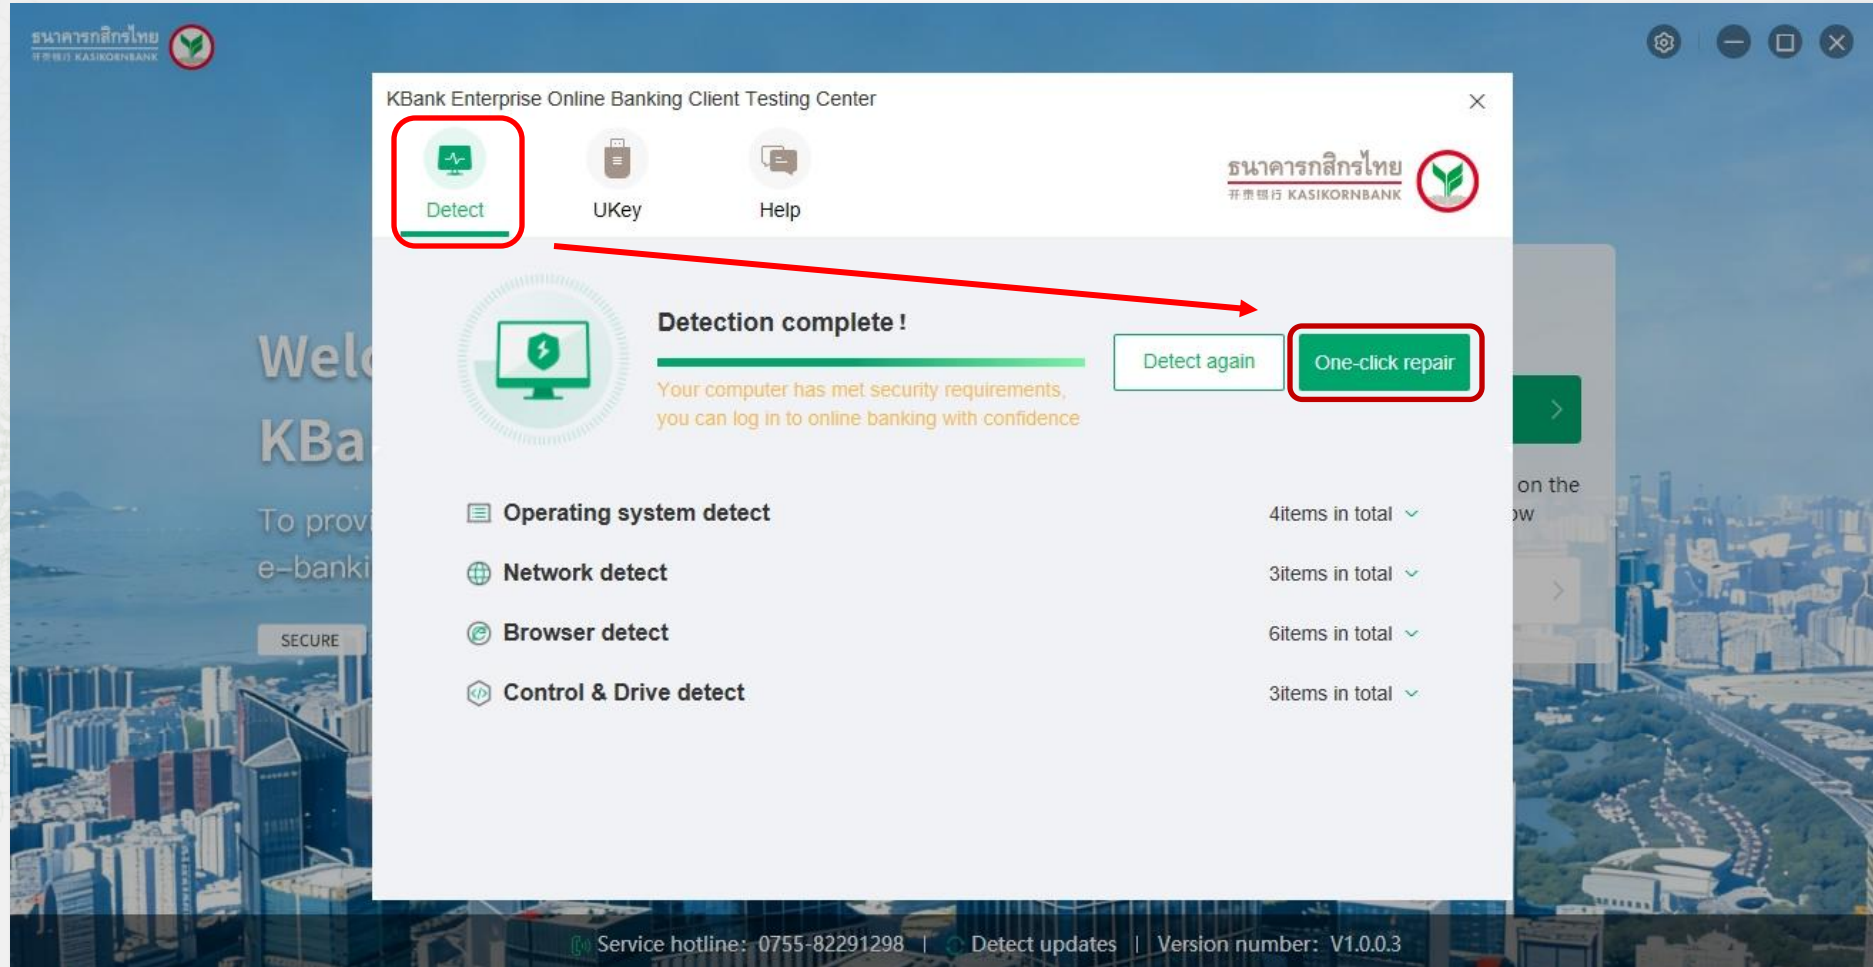

Detection & Repair

After installing the app, it is necessary to install the relevant internet banking security controls. Pls entre in “Detection and Repair” to complete the security controls download.

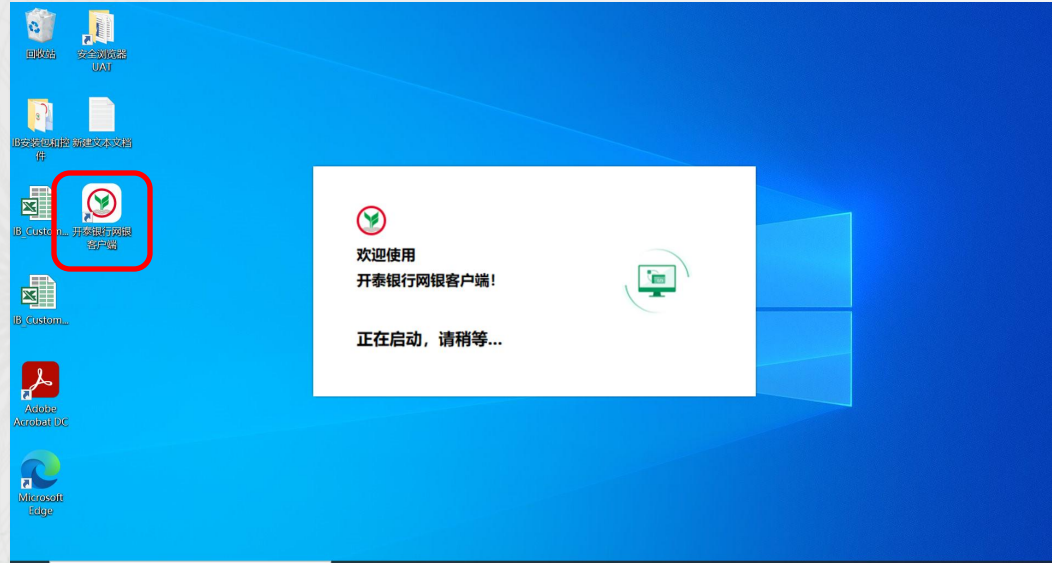

บริการทุกระดับประทับใจ

Detection & Repair

Click "One-click Repair" and the system will automatically load all security controls.

บริการทุกระดับประทับใจ

1. Reopen the internet banking client App:

① Click the desktop icon / ② Insert the USB-KEY (as shown in the left image)

➤ Important Notice:

Please confirm that the “Internet Banking for Business Service Login Password and USB-Key Receipt ” has been stamped and posted back to the bank.

➤ To ensure your company's account security, we will only unfreeze your Internet Banking user account after receiving the “ Receipt”, after which your users may log in and use our internet banking services;

➤ Check that the USB-Key packaging is intact and undamaged;

➤ Do not scan the QR code on the packaging—the instructions have expired.

修改KBank U-Key名称

- After inserting the USB Key, please confirm that the screen of the USB-Key is lit up and the "USB-Key management tool (Figure 3)" pops up; At this point, you can minimize the management tools;
- The initial password of USB Key is Eight 8s (Figure 1), and the system will force you to change the USB-Key password (Figure 2) to your owned and remember it.
- If the USB-Key password is entered incorrectly 6 times in a row, it will be completely locked. You need to submit a paper application form and visit the KBank counter in person to unlock it. Please remember your password carefully;

บริการทุกระดับประทับใจ

- We will send your customer ID, user ID, and initial login password to **your email address** registered with our bank.
- What is the email address for our internet banking system **KBANK_IB@kasikornbank.com.cn**. In order for you to receive more internet banking notifications from KBank in the future, please whitelist the above email address.

Password Changing

* Old Password :

* New Password :

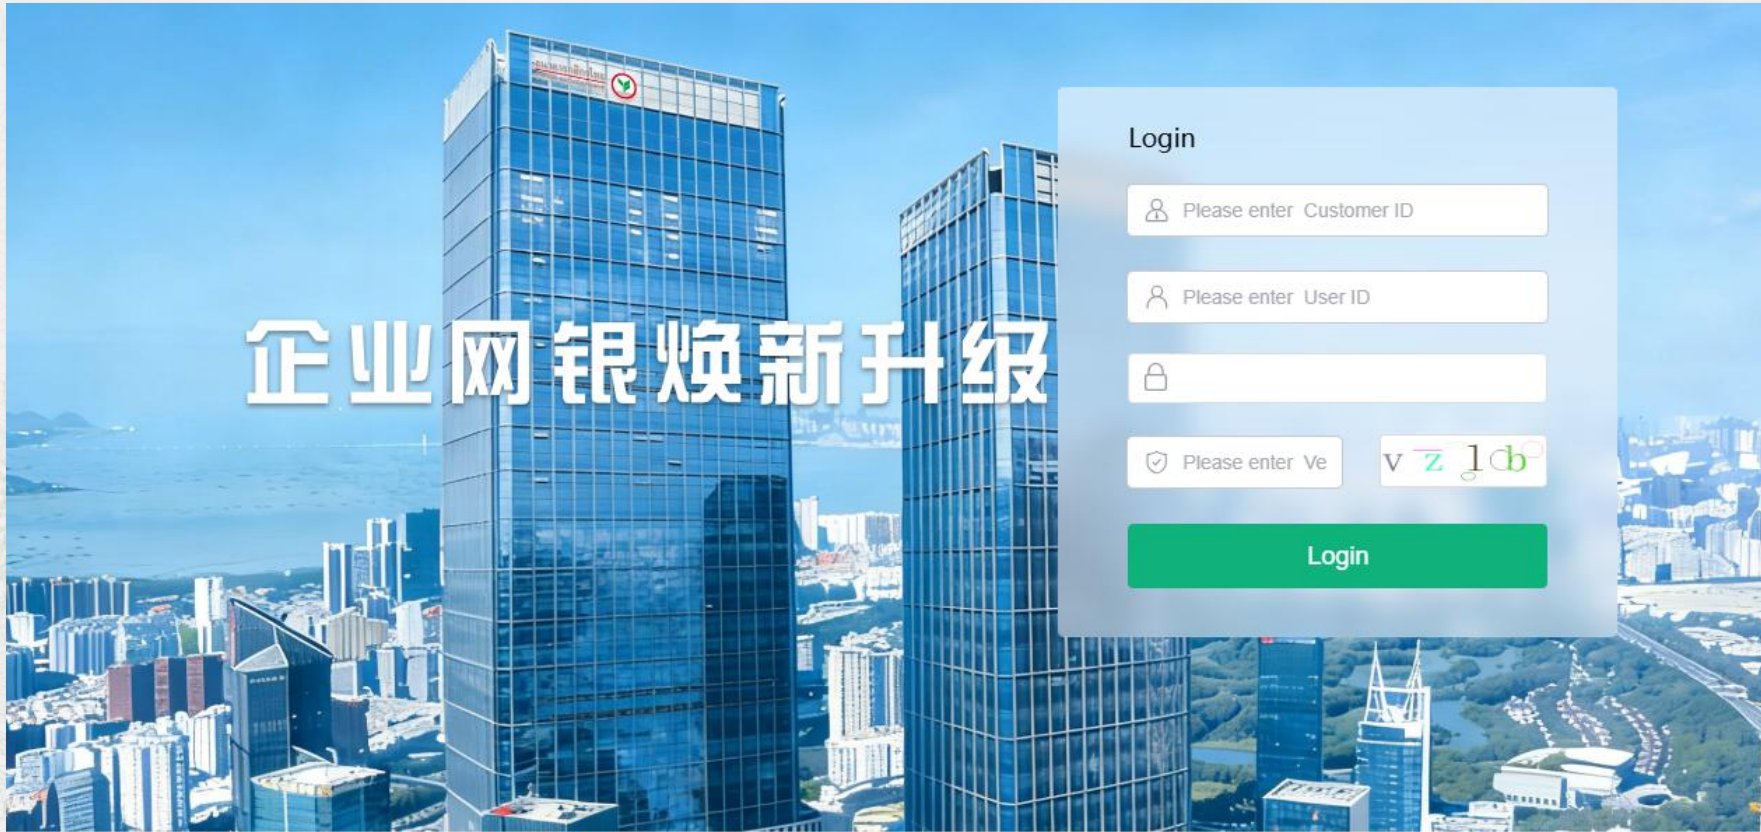

* Confirm Password :

Reset Submit

Warm Tip

- 1、 The password should be 8 to 20 characters long and may include numbers, uppercase and lowercase English letters, and special characters. It is case-sensitive. To enhance the security of your password, it is recommended to use a combination of numbers, letters, and special characters, and to avoid using patterns or predictable sequences.
- 2、 Do not use this feature in public places, such as internet cafes or on someone else's computer.
- 3、 Your online banking password is an important piece of information for using online banking. Please keep it safe to prevent it from being lost or forgotten.

- After entering the initial login password correctly, internet banking will force you to change the initial login password.
- Kind Reminder: Please remember the USB-Key password (first layer password)+internet banking login password (second layer password) and distinguish them.

- Please log in with the newly modified login password.
- The login password will be temporarily frozen if entered incorrectly **5 times** in a row on the same day, **totaling 10** times. The designated internet banking administrator of your company can unfreeze or reset the password through “Internet Banking Corporate Management” function.
- But if the administrator enters the wrong information **10 times** in a row and is locked, they need to submit a paper application form to KBank to reset the password.
