

Kasikornbank (China) Corporate Internet Banking Installation Guideline

1. In your web browser, visit the component download link:

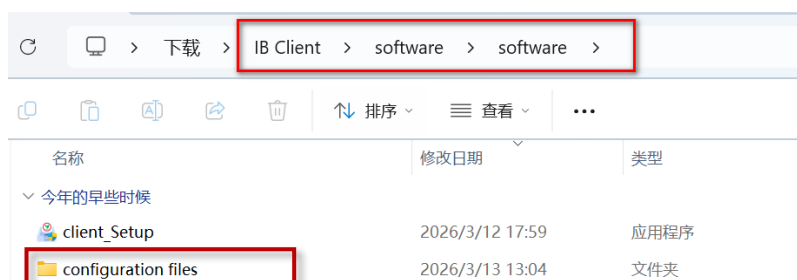

<https://www.kasikornbank.com.cn/html/corporate-internet-banking-en/>

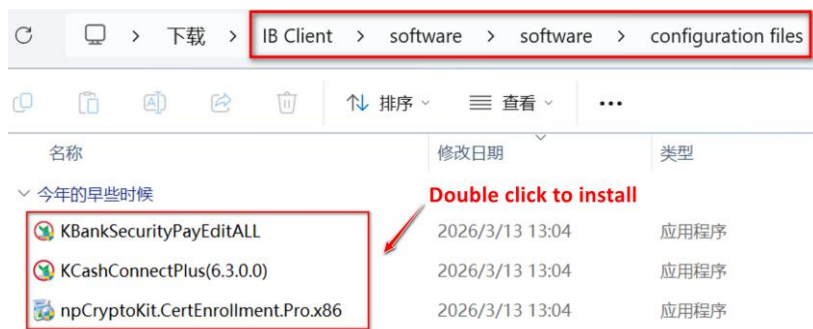

2. On the page, click the “Software Download” link. The downloaded file (name: IB Client, format: ZIP) will be saved in your browser’s default download folder.

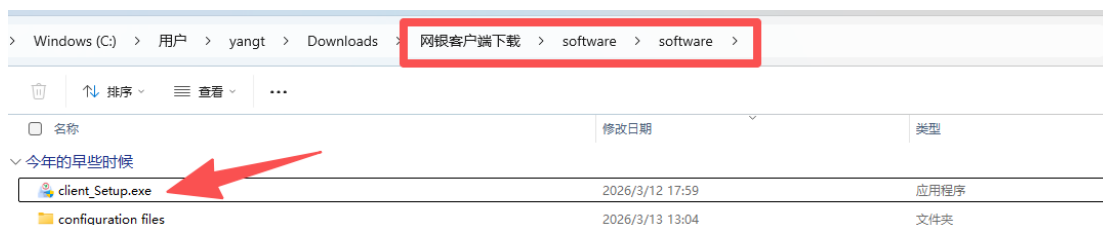

3. Extract the ZIP file (IB Client.zip). Open the configuration files folder inside the extracted directory, and double-click to install the following three components in order:

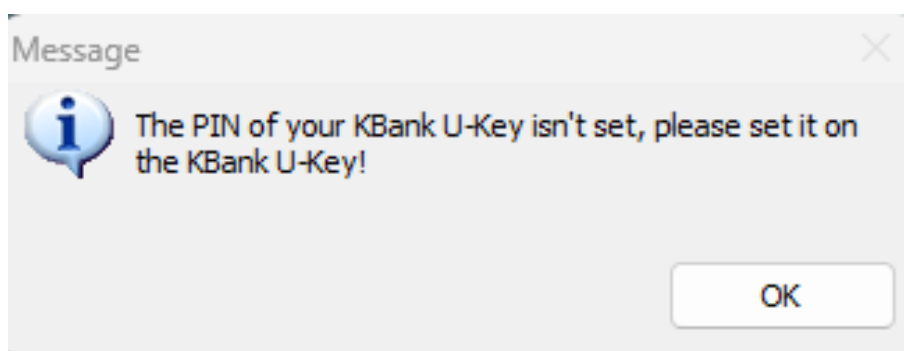

- Security Control: KBankSecurityPayEditALL.exe
- USB Key (Token) Management Tool: KCashConnectPlus(6.3.0.0).exe
- Certificate Installation Control: npCryptoKit.CertEnrollment.Pro.x86.exe

4. Afterward, double-click client_Setup.exe to install the Internet Banking Client.

5. Once all components and the client are installed, insert the USB Key (Token). A system prompt will appear. Click “OK” to change the initial password.

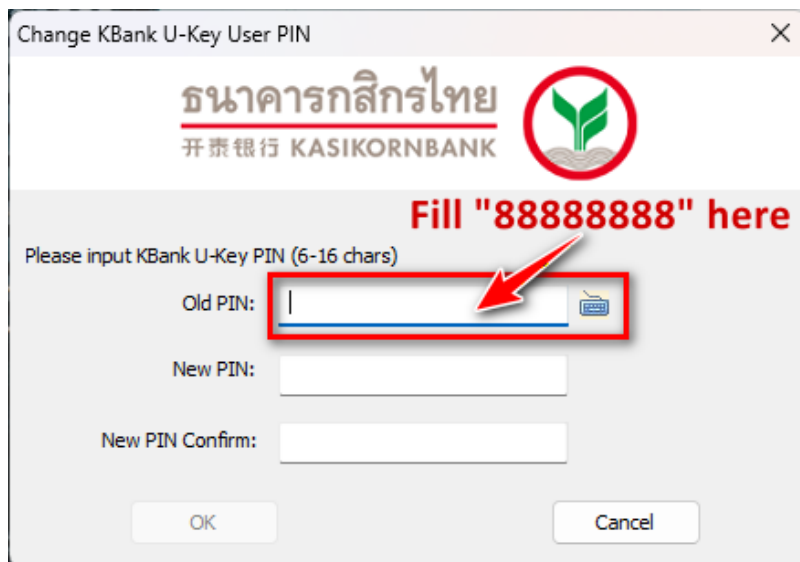

Note: Changing the initial password is mandatory upon first use of the USB Key (Token).

6. On the password change screen, enter the **original password (fixed as 88888888)**, then enter your new password.

⚠ Important: Please memorize your new password securely. If the USB Key (Token) password is entered incorrectly 6 consecutive times, token will be permanently locked. You must bring a valid ID and the locked token to

Kasikornbank (China) branch for replacement.

Change KBank U-Key User PIN

ธนาคารกสิกรไทย
开泰银行 KASIKORNBANK

Fill "88888888" here

Please input KBank U-Key PIN (6-16 chars)

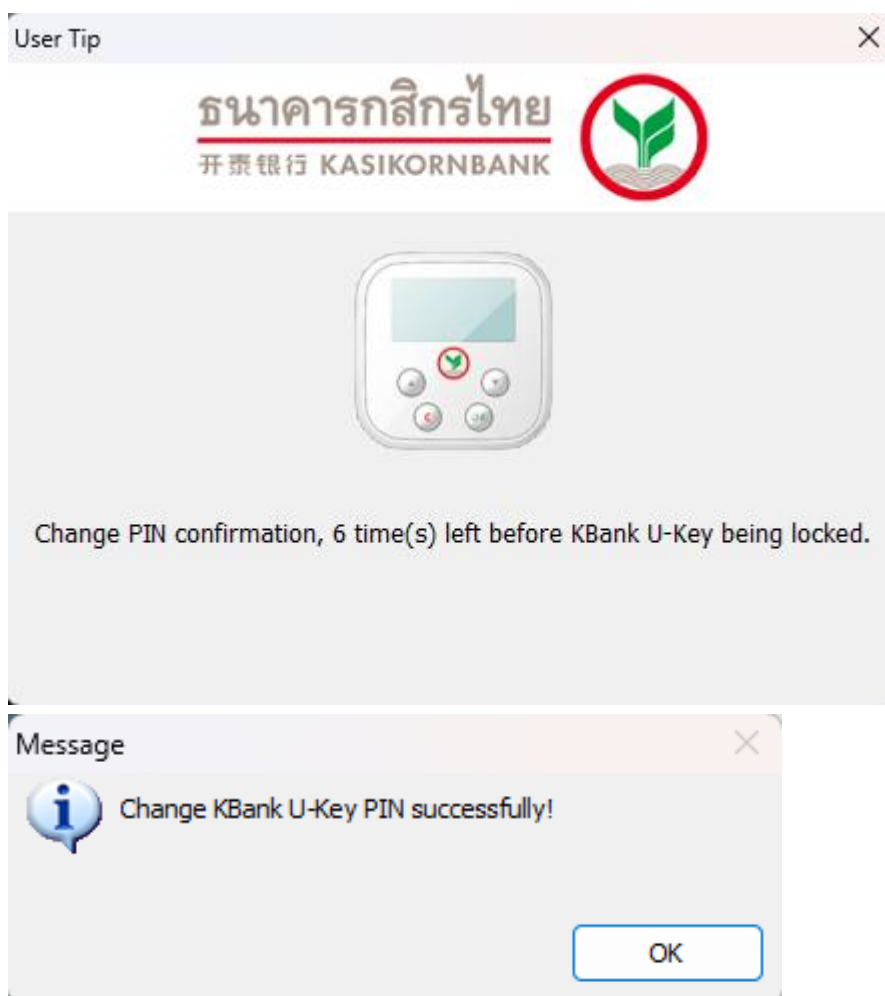

Old PIN:

New PIN:

New PIN Confirm:

OK Cancel

7. After entering the passwords and clicking “OK”, a confirmation screen will appear. Press the physical “OK” button on the USB Key (Token) to complete the reset.

User Tip

ธนาคารกสิกรไทย
开泰银行 KASIKORNBANK

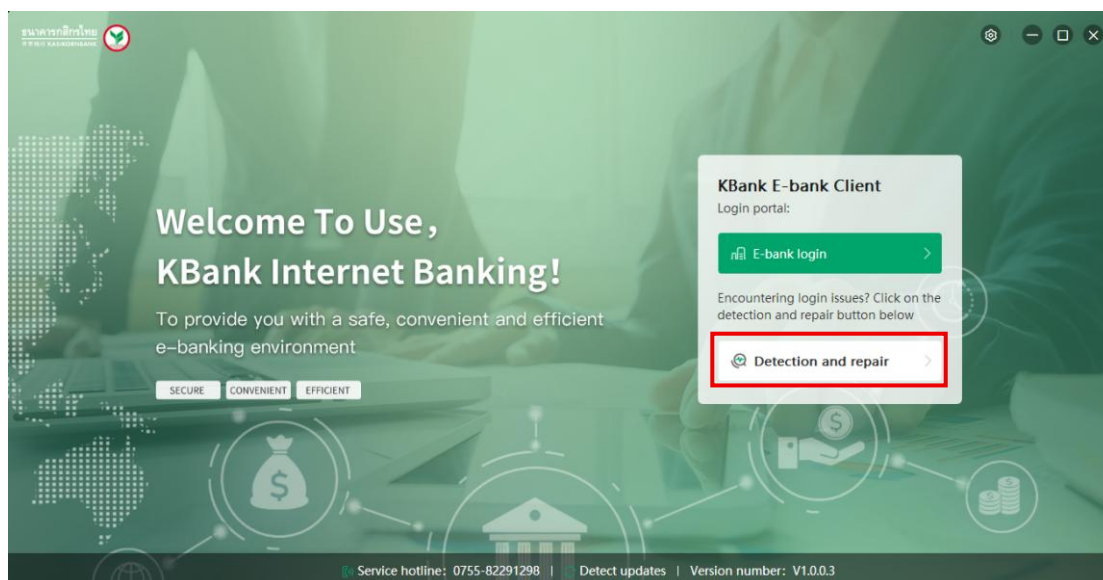

Change PIN confirmation, 6 time(s) left before KBank U-Key being locked.

Message

Change KBank U-Key PIN successfully!

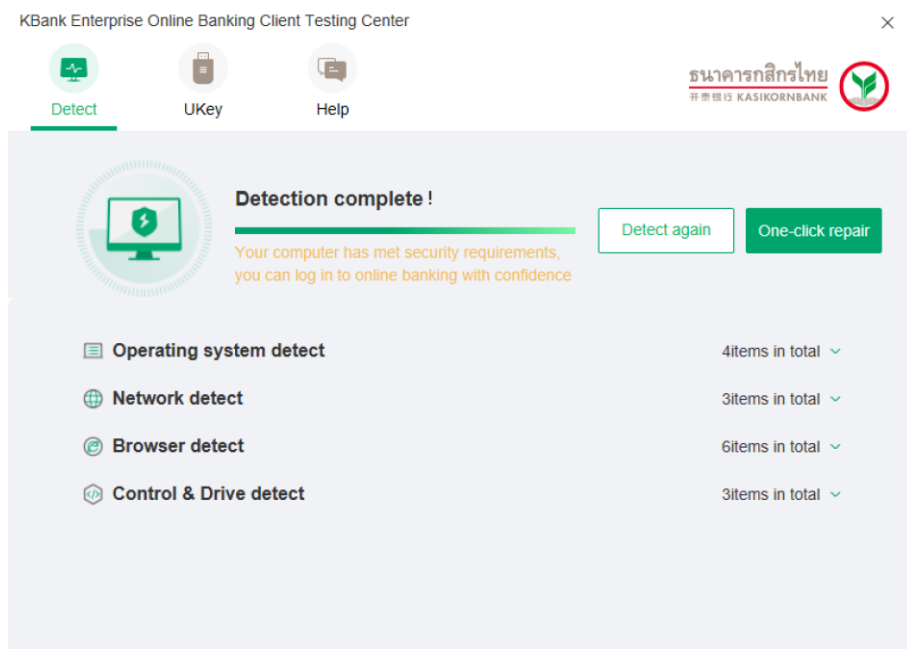

OK

8. Launch the Internet Banking Client.

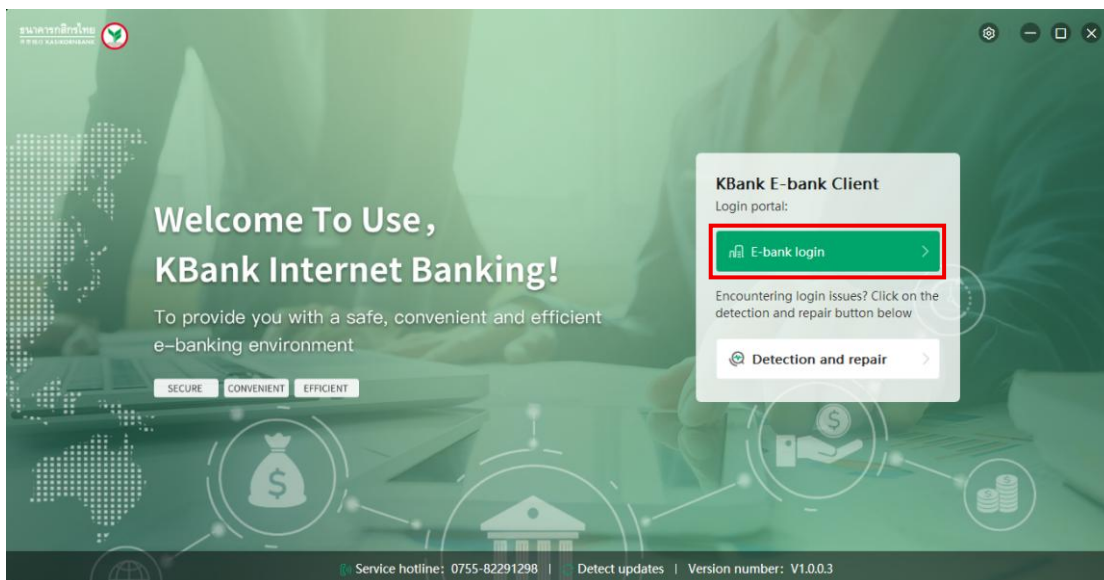

On first startup, click “Detection and repair” to verify components and system environment.

- If the status dialog shows all checks passed (as shown in the reference screenshot), you may proceed directly.
- If any issues are detected, click “One-click repair” in the dialog to fix them automatically.

9. Close the check window and return to the client homepage. Click “E-Bank login” to open the USB Key (Token) password prompt.

10. Enter your USB Key (Token) password to proceed to the login page.

Note: Enter the USB Key (Token) password you just reset, not your online banking login password.

11. On the login page, enter your:

- Online Banking Account (Customer ID & User ID will be auto filled when plug-in USB Key)
- Login Password (initial password is sent via email)
- CAPTCHA Code

Click “Login” to access the system. You will be required to change your login password on first access.

▲ Important: The Login Password and USB Key (Token) Password are two separate credentials. Please keep them strictly distinguished.
